

In times of health emergency, the needs for social assistance urge those most in need. For this reason, JBG has continued with its commitment to provide humanitarian aid to institutions and people who have more difficulties, through the permanent donation program that it maintains.

So today, Tuesday, May 15, Junta donated 25 folding, resistant cardboard bed bases, 1000 toilet soaps and 20 single-seat mattresses, to the Huancavilca Foundation that will be delivered to people from Mount Sinaí infected of Covid-19 and that they need to be isolated, at this time, from their families.

Juan Villafuerte, Executive Director of the Foundation pointed out that the Strategic Alliance that they maintain with JBG, has made it possible to directly benefit people from socially and economically vulnerable sectors.

Héctor Ullauri, Head of Donation Logistics of JBG, pointed out that this donation is in addition to another of 7 wheelchairs and two mechanically powered cars that were made last week to the same foundation.

Donations are made thanks to the international cooperation that organizations such as Free Wheelchair Mission and Mobility World Wide maintain with Junta de Beneficencia de Guayaquil.
