

During a tour through the “Roberto Gilbert E” Children's Hospital and the “Alfredo G. Paulson” Women's Hospital, Diplomat Andrew Sheer showed amazement not just at the installations and infrastructure but also at the service and specialized attention extended to the country's mothers and children.

It is the first time he has visited the hospital complex extending his blessing to the humanitarian agreement kept for over 15 years with two Northamerican Medical Missions which arrive at the Pediatric Hospital to resolve together certain, highly complex children's pathologies.

The Consul was accompanied by Eng. Ernesto Noboa, Junta de Beneficencia Director, to the main Alejandro Mann Hospital complex authorities.
