

The meeting Between representatives of the Jesus Christ Church of Latter Day Saints and those of la Junta de Beneficiencia de Guayaquil ended with a donation of 10 wheelchairs to persons of scarce resources.

The meeting was propitious to express gratitude of beneficiaries of this strategic alliance, the aid of the international entity channeled through the Guayaquil institution reaching out on a national level fundamentally with a wheelchair donation.

Eng. Juan Martinez recalled the case of a young barcelona fan who lost his leg in an accident and who recently received a wheelchair donation thanks to the disinterested and efficient collaboration between the church and La Junta for many years to extend health and welfare to those most in need.

Ophthalmology equipment at the Luis Vernaza Hospital and training at the Alejandro Mann Hospital Complex constitute part of the support the Junta de Beneficiencia has received from the Jesus Christ Church of Latter Day saints which directly benefits patients.

David Frischknechten representing the church held that they function under the mandate of love for your fellow-man which is manifested through chair donations and the work performed by La Junta personnel to channel delivery, making sure the help reaches those who really need it and free-of-charge. "we do this work together with love and a lot of perseverance", he commented.

After the event we strolled around the Hospital Complex's different areas which amazed representatives with their complexity, its personnel, capacity and Hospital infrastructure where Ecuadorians' health is attended.
