

As part of its commitment to social responsibility, Laboratorios Life delivered to the Hospital Luis Vernaza of the Junta de Beneficencia de Guayaquil (JBG), a batch of 1920 saline solutions and 540 ampoules of acetylcysteine, essential medicines for a month of treatment of patients with Covid -19.

Carlos Cañarte, Sales Manager for the coastal region of Laboratorios Life, pointed out that this donation made by the company is a way to contribute to this pandemic with products made by Ecuadorians and that it will give support so that this situation is controlled by professionals who are doing important work in both public and private institutions

Luis Trujillo, First Deputy Director of Junta de Beneficencia de Guayaquil thanked the company and stressed that the donation is not only important for the Luis Vernaza Hospital, but for all the JBG hospitals. "The patients treated in our institutions are those who benefit from this donation that is so necessary at this time of the pandemic that has devastated our city and the country," he said.

The delivery of the supplies in Guayaquil oversaw the executive staff of LIFE, together with representatives of Junta de Beneficencia de Guayaquil.
