

All I am missing is to cry tears of blood, to ask God forgiveness for the damage I caused my son, confesses a repentant mother while delicately stroking the scars that her 13 year-old son bears on his legs as a consequence of third degree burns he suffered at age 6.

Veronica is a widow and tells about how in a moment of rage and desperation concerning Bryan and his three older brother's misbehavior "I threatened to throw hot water on their feet, but never imagined I would lose control to the point that I would hurt one of my little ones". She expressed.

Bryan has kept these wounds underneath his pants from 2010 which forced him to remain for 9 months in the unit for the burnt at the Roberto Gilbert Children's Hospital. Since that day he goes to the Hospital every so often for, healing purposes and to prepare himself for the last surgical interventions.

During Bryan's Hospital stay, Veronica stayed at the "Rosa Eva Aguilar de Sanchez" Social Shelter run by the Hospital's volunteer service and which is one of the benefits offered by the Dr. Roberto Gilbert Children's Hospital for the families of patients hospitalized from other provinces.

"I am very grateful for all the support extended by the Hospital and specially for healing my son. Without you I wouldn't have been able to absorb all of Bryan's medical requirements. I've received helped with surgeries and healing procedures", said Veronica.
